INTER BATCH SHOWDOWN

We are excited to announce a Inter Batch Showdown designed to evaluate your creativity, problem solving ability, and real world development skills.

Project Type: Frontend Web Project

Tech Stack: HTML, CSS, JavaScript

Submission Deadline: 24th January before 12:00 AM

Evaluation: Creativity, UI/UX & Functionality

Rewards: 5 Best Submissions

Challenge Overview

You will be given one common topic, and every participant must build the same core project based on that topic.

Mandatory Requirements

- All mentioned features must be implemented without exception.
- Along with the required features, you must add your own unique enhancements or add-ons.
- Each participant's design must be different. Creativity, UI/UX decisions, and originality will play a major role in evaluation.

Technology Constraints

- The project must be developed using only HTML, CSS, and JavaScript (DOM).
- No frameworks or external libraries are allowed unless stated otherwise later.

AI Usage Policy (Strictly Enforced)

- You may use AI for guidance, understanding concepts, logic clarification, or debugging help.
- Copy-pasting AI-generated code is strictly prohibited.
- Projects that appear to be entirely generated by AI will be disqualified.
- We will review and verify the code, so make sure you understand and write every part of it yourself.

Mentorship Policy

This is a competition, so mentors will not provide help.

You are expected to analyze the problem, plan the solution, and execute every task independently.

Rewards & Recognition

No participation certificates will be provided for this competition.

First five best submissions will receive some reward.

Submission Details

Submission Deadline:

24th January before 12:00 AM

- A **submission form** will be shared with all participants.
- The form must be filled using your ****registered email ID only****.
- You will be required to submit:
 - Your **GitHub repository link** (project source code)
 - Your **live project deployment link**
 - A brief Description of your project.

Important Rules (Strictly Enforced)

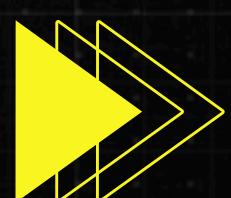

- You must **not share your code or project work with anyone** before the competition ends.
- **After 12:00 AM (midnight) on the submission date**, no code should be pushed to GitHub.
- Any participant found pushing code **after the deadline will be disqualified**.

Deployment Assistance Policy

- If you are **not familiar with project deployment**, you should:
 - Watch the **shared YouTube deployment tutorial** [youtu.be/sSVI2JReVSg], or
 - Take **deployment-related help from mentors**.
- Mentors will **only assist with deployment, not with coding, logic, or features**.

Submission Day Guidelines

- **Do not ask for help on the day of submission.**
- If you need deployment support, reach out to mentors one day before the submission date, so everyone can be assisted properly

This challenge is meant to test:
Your independent thinking
Your core frontend fundamentals
Your ability to handle pressure and ambiguity without external help
Give it your best.
Build from scratch. Think creatively. Prove your skills.

Best of luck to everyone!

Please check the link for complete competition details.

All information related to the project topic, requirements, and guidelines is clearly mentioned there.

Make sure to go through it carefully before starting your work.
